Selected fixed-scope consulting
Penang + Remote

Built under FIRDAUS BUILDS — one rule: if it doesn't work for real people, it doesn't ship.

Mohamad Firdaus

ERP/MES & Workflow Systems · C#/.NET · Python · Full-Stack Delivery

Senior Software Engineer · Manufacturing Systems · Workflow Automation · Balik Pulau, Penang

Profile — Senior software engineer who builds reliable software around real operating workflows. Architected and built a production ERP replacing SAP/Navision for refinery operations across manufacturing execution, supply chain, finance, HR and procurement. Strongest evidence is end-to-end delivery: requirements, architecture, C#/.NET foundations, Nuxt/Vue/TypeScript, Python, SQL, testing and supportability.

EXPERIENCE

Senior Software Engineer / Head of Software 2024 – Aug 2026

- GlobalIoT Sdn Bhd
- Architected and built the company's core ERP replacing SAP/Navision — manufacturing execution for palm oil refinery operations (supply chain, finance, HR, procurement)
 - Designed the system around operational continuity, data integrity, and support after release
 - Led a team of engineers, established code review, CI/CD, and development standards
 - Owned requirements, architecture, development, QA, support and mentoring across the delivery lifecycle
 - Delivered production software for a confidential refinery client

Web Developer 2022 – 2024

- ePandu Sdn Bhd
- Built job portal with merchant subscriptions generating recurring revenue
 - Built full e-commerce platform — product management, payments, fulfillment

E-Commerce Developer Jan – Dec 2021

- GAMA Supermarket & Dept Store
- Built e-commerce platform from scratch for a major retail chain; ran the department end-to-end — product, payments, fulfillment

IT Support Specialist 2019 – 2020

- DISTED College
- Built library mgmt, ticketing, and knowledge base systems in-house
 - Automated audit processes. Maintained ISO 9001

Asst. IT Supervisor 2016 – 2018

- GAMA Supermarket & Dept Store
- Led company-wide POS deployment. Built ticketing and knowledge base systems

Software Engineer 2012 – 2015

- UniKL Resources Sdn Bhd
- Extended Microsoft Dynamics AX (enterprise .NET ecosystem) via custom plugins — financial workflows, SQL Server-backed data
 - Developed a financial system for MARA (government agency) — complex financial workflows
 - Built web services integrating with e-Perolehan (government e-procurement)

SELECTED EVIDENCE

Enterprise ERP — Refinery Operations
Production ERP replacing SAP/Navision across manufacturing execution, supply chain, finance, HR and procurement.
Nuxt · Vue · TypeScript · Prisma · MariaDB

EMS — Engineering Management SaaS
Delivery system for requirements, standards, project work and evidence.
Nuxt · Vue · Vuetify · Prisma · TypeScript

CHRONO — GTA V Mod (C# / .NET)
Public release with 526 automated tests, 0 warnings, a custom installer and a release pipeline.
C# · .NET · ScriptHookV · DotNet · TDD

Second Brain — AI Knowledge System
Private knowledge system with semantic search, knowledge graphs and more than 125,000 documents.
Python · ChromaDB · FastAPI · SQLite

What I bring — I turn operating requirements into software that can be tested, supported and improved after release. I lead across analysis, architecture, development, QA and delivery, with evidence behind the work. References available on request.
