Remote Worldwide

Mohamad Firdaus

Built an ERP that replaced SAP, from scratch.

Senior Software Engineer · 15+ Years · Full-Stack · AI/ML · Balik Pulau, Penang

Who I Am — Self-taught engineer who built a complete ERP replacing SAP/Navision for the palm oil industry. 15+ years across finance, retail, education, recruitment tech, and palm oil. I build systems that solve real business problems — not prototypes, not toys.

EXPERIENCE

Senior Software Engineer / Head of Software

2024 – Present

GlobalIoT Sdn Bhd

- Architected and built EOIoT — a full ERP replacing SAP/Navision for palm oil refinery operations (supply chain, finance, HR, procurement, operations)
- Led a team of engineers, established code review, CI/CD, and development standards
- Wore 7 hats: BA, PM, Architect, Developer, QA, Support Lead, Mentor
- Served a government-linked client (Sawit Kinabalu / Kunak Refinery)

Web Developer

2022 – 2024

ePandu Sdn Bhd

- Built job portal with merchant subscriptions generating recurring revenue
- Built full e-commerce platform — product management, payments, fulfillment

E-Commerce Developer

2021

GAMA Supermarket & Dept Store

- Built e-commerce platform from scratch for a major retail chain
- Managed department and cross-functional coordination

IT Support Specialist

2019 – 2020

DISTED College

- Built library mgmt, ticketing, and knowledge base systems in-house
- Automated audit processes. Maintained ISO 9001

Asst. IT Supervisor

2016 – 2018

GAMA Supermarket & Dept Store

- Led company-wide POS deployment. Built ticketing and knowledge base systems

Software Engineer

2012 – 2015

UniKL Resources Sdn Bhd

- Built financial system for MARA (government agency)
- Web services for e-Perolehan. Extended MS Dynamics AX

FEATURED PROJECTS

EOIoT — Enterprise ERP

Full-scale ERP replacing SAP/Navision. SCM, finance, HR, procurement, refinery ops.

Nuxt · Vue · Python · Prisma · PostgreSQL

EMS — Engineering Mgmt

SaaS for managing teams and projects with engineering standards.

Nuxt · Vue · Vuetify · Prisma · TypeScript

TradeAI — AI Trading

ML forex prediction generating calibrated BUY/SELL probabilities.

Python · FastAPI · Scikit-Learn · Pandas

Second Brain — AI Knowledge

AI system with 125K+ docs, semantic search, knowledge graphs.

Python · ChromaDB · LLM · FastAPI · SQLite

Why hire me? I replaced SAP with a custom ERP. I built 4 production systems from zero. 15 years of self-taught engineering across 6 industries. I lead teams, architect solutions, and ship code that works. **Most engineers write code. I build businesses.**
